SUMMARY

Front-End Developer with 3.5+ years of experience building production web applications using React, Next.js, TypeScript, and Tailwind CSS. Experienced in scalable UI architecture, authentication, real-time applications, AI integrations, and modern deployment workflows. Passionate about creating fast, maintainable, and user-friendly digital products.

EXPERIENCE

Front End Engineer

Hecto

11/2025 – Present Bushehr

A company working on LMS AI-assisted platform.

- Led development of an AI-assisted Learning Management System.
- Built scalable React and TypeScript applications.
- Integrated LLM APIs and streaming AI features.
- Developed real-time collaboration using WebSockets.
- Implemented authentication, RBAC, notifications, and shared UI systems.

Junior Front End Developer

Daryatech

03/2023 – 06/2023 Bushehr

Daryatech core working in PGU university science co.

- Built type-speed and Unity mini-game prototypes.
- Self-studied React and Node.js while shipping features.
- Built production dashboards with React.
- Integrated REST APIs.
- Worked in Agile teams using GitHub workflows.

PROJECTS

Hecto LMS System

11/2025 – Present Bushehr

LMS role-based system to improve the education system.

- Shipped an AI-assisted LMS from concept to production with role-based access.

Razi Server

01/2026 – 2026 Freelance

CRM + web app for the Razi Server team.

- Delivered a hosting CRM and storefront with catalog, filters, and customer panel handoff.

[Live](#)

ExamForge

05/2026 – 07/2026 Freelance

Offline-first examination platform with timed exams, analytics, gamification, progress tracking, and modern state management.

- Built a local-first exam runner with analytics and smooth long-session state management.

KEY ACHIEVEMENTS

LMS System

Led the front-end development of an AI-powered Learning Management System from concept to production.

Scalable Architecture

Designed scalable and reusable React/TypeScript architecture that accelerated feature development.

AI Assist to Education

Integrated AI capabilities and streaming responses to enhance user learning experiences.

Role Based System

Built secure authentication, role-based access control, and protected application routes.

Performance & Load Speed

Improved application performance through code optimization, lazy loading, and efficient state management.

Git Workflow

Participated in Git-based team workflows and Agile development practices.

Backend Collaboration

Integrated REST APIs and transformed backend data into intuitive user experiences.

Optimized State Management

Optimized state management for smooth performance during long exam sessions.
